# Tube-Ice<sup>®</sup> Machines

Tube-Ice

## HES-20, 30 & 40 Vogt Tube-Ice Machines

- 2,000 to 4,000 lbs./day of cylindrical tube-ice
- R-22 refrigerant
- Water-cooled or air-cooled
- Available with or without stainless steel casing
- Crushed ice available with optional conversion kit

## “More Ice With Less Energy”

## HE-60S, 60M & HE100 Vogt Tube-Ice Machines

- 6,000 to 10,000 lbs./day of cylindrical tube-ice
- R-22 refrigerant
- Water-cooled or air-cooled
- Optional 404a refrigerant available
- Crushed ice available with optional conversion kit
- Patented water distribution
- Hot gas harvest

## P18XT Vogt Tube-Ice Machines

- 8 to 10 tons/day of cylindrical tube-ice
- R-22 refrigerant
- Water-cooled or air-cooled
- Optional 404a refrigerant available
- Crushed ice available with optional conversion kit
- Patented water distribution
- Hot gas harvest

**Space Saver Turbo  
Fragmented-Ice Machines**

- 2,000 – 4,000 Lbs./day of fragmented-ice
- SC/SCAR – self-contained DX R-22 with water cooled condenser or remote air-cooled condenser
- Designed for bin top installation

**DF-6 Turbo Fragmented-Ice Machines**

- 12,000 Lbs./day of fragmented-ice
- SC – self-contained DX R-22 refrigerant with water-cooled condenser
- SCA – self-contained DX R-22 with skid mounted air-cooled condenser
- SCAR – self-contained DX R-22 with remote hot gas harvest
- Designed as stand alone or bin top installation
- Hot gas harvest

# VT-SERIES Ice Machines

## VT Series Cracked-Ice Machines

- 4,000 – 8,000 Lbs./day of cracked-ice
- Self-contained R-22 skid mounted air-cooled condensing unit
- Self-contained R-22 skid mounted remote air-cooled condenser
- Low side only option
- Hot gas harvest
- PLC Controls
- Polythelene water pan and distribution system

Cracked-Ice

# Goldenrod Water Treatment

## Goldenrod Water Treatment

- Goldenrod technology will reduce maintenance, minimize downtime, and extend the life of your equipment by preventing the buildup of scale deposits.
- Sizes to treat 5 gpm to 1,600 gpm available

**Vogt Ice, LLC** has a wide range of ice machines which produce from 2,000 to 12,000 pounds per day of tube-ice, fragmented-ice or cracked-ice depending on the model. This means Vogt can truly fill every need for high volume ice and what this means to you is you can rest assured you will get the right ice machine for the right commercial application. Be it hospital, hotel, chemical/industrial, meat/poultry, seafood, produce/bakery, casinos, correctional institutions, amusement parks, airline/mobile catering or concessions—Vogt has the best match for your need by matching a specific ice machine to your commercial capacity requirements.

**Vogt Ice Machines' benefits:**

- Environmentally friendly HFC refrigerant available
- Stronger, more durable, runs cooler, lasts longer
- Simple, proven, efficient, pre-set at factory
- Reduces possibilities of leaks
- More consistent operations during extreme temperatures
- Protects compressor during low or high voltage
